

7 February 1950

MEMORANDUM TO: Assistant Director, OGD

SUBJECT: CADO

1. With reference to your memo of 31 January 1950, and the attached letter, I checked with Col. Joel Mallory, Chief, Documents and Dissemination Branch, Directorate of Intelligence, USAF.
2. He confirmed your understanding of CADO's activities, that it is charged with the indexing and filing of strictly technical documents for the use of various components of the Department of Defense and educational and industrial organizations working under Government contracts.
3. CADO works under the broad supervision of RDB and as such there has been no change from your original understanding.
4. However, Col. Mallory feels that they do have the requirement of indexing certain reports prepared by CIA and as such an explanation of the report numbering system so that the report number, on a particular report could be identified would be helpful. It is thought that such information could be given them without telling them more than they need to know concerning CIA output and production.
